## Crop Average and Crop Yield

Addressing the Canadian Club of Regina during the week of the Provincial Exhibition, Dr. Tolinie, the Dominion minister of agriculture, laid emphasis upon the fact that, despite a steady and really large increase in acreage under cultivation in Canada during the last ten years, there had been a marked falling off in yield per acre, with the result that the farm production of the country had not grown in volume to the extent that might have been expected from the increase in acreage placed in crop.

Commenting on this disappointing result the Federal minister of agriculture said: "An increase of three bushels to the acre in the production of wheat in Canada would mean an additional increase of over \$118,000,000, and over \$500,000,000 could be added to the wealth of the country every year if the farmers would exercise more intelligence and enterprise in their agricultural operations."

These are startling figures even in this age when we have become accustomed to reckoning things in the millions of dollars. And Dr. Tolinie was speaking by the book; the official statistics of Dominion and provincial governments bear out the assertions he made.

It is assuredly in the interest, not only of the country as a whole, but in the interest of the individual farmer, that the causes of this decline in yield per acre should be ascertained and steps taken to check its further progress and to bring about a steady increase in yield. There is far too much money, and infinitely larger profits, in increasing the yield per acre than in increasing the number of acres in crop which produce a comparatively small yield.

Dr. Tolinie suggested certain remedies. First, a large increase in yield can be obtained from a more general use of good seed. Second, an intelligent rotation of crops will inevitably produce larger yields. Third, the introduction of more live stock on the farm will tend to the same much desired end.

There are other points which Dr. Tolinie did not dwell upon, but which must suggest themselves to any person journeying through the grain fields of the West and along our country roads. First and foremost there is the question of weeds. Western farmers spend huge sums of money annually in bad insurance premiums, but the annual loss from hail is but small in comparison with the annual loss resulting from the increased yield because of weeds. Thousands of dollars are spent annually in fighting the weeds in Manitoba and Saskatchewan this year because of thousands of dollars have been expended in the effort to overcome the grasshoppers. And it has all been money well spent. But year after year weeds take a greater toll than these pests without half the efficient or effort to eradicate them and stop the loss.

In many directions government and farmers' organizations are striving to improve the condition and, in some cases, the quality of the farmers, but thousands of farmers are themselves neglecting a matter the control of which is in their own hands. They are growing weeds instead of wheat, oats, barley and flax. Where there is an abundant crop of weeds there cannot be a heavy yield of grain.

## The High Price of Sugar

makes one welcome foods which are rich in natural sweetness.

## Grape-Nuts

—the ready-cooked cereal

requires no added sweetening, for it contains its own pure grain sugar, developed from wheat and barley by twenty hours' baking.

Sprinkle Grape-Nuts over ripe fruit or berries and you'll save sugar.

Sooner or later the whole of Western Canada will have to be made to live in connection with the weed problem, and the sooner the better for all concerned, and the cheaper in the long run. Public opinion on the question is daily asleep with the result that a weed official who proceeds to force his ideas upon the farmer is likely to find himself a most unpopular individual.

Another difficulty to be found is the weakness of so many men to acquire more land. More acreage seems to be their ambition rather than more grain. They seem to be happier with 500 acres yielding 14 bushels to the acre, or 7,000 bushels, than with 350 acres yielding 20 bushels to the acre, or a like total crop of 7,000 bushels, although it is cheaper to plow, seed, harvest and thresh the 350 acre crop than it is the 500 acre one, not to speak of the capital tied up in the larger acreage which, in reality, is producing nothing. Men who are not tilling the land they have at it ought to be killed, are constantly mortgaging their future to buy more land and more equipment to work it. They are not farmers, but speculators, but land speculators. The West needs more of intensive cultivation, that is, better farming, rather than more acreage brought under the plow.

## Prince Edward's Work

He Does His Work Well Because He Is a Highly Trained Worker

"On the prince's part, it is a remarkable achievement to have carried out his mission in such a way as to create this strong bond of sympathy between himself and the people of the Commonwealth. Beyond question he has done Imperial service of the utmost usefulness. But we venture to think that his greater asset has been his personality. He does his work well because he is a highly trained worker. From his boyhood he has been prepared and has prepared himself for one of the most difficult and responsible employments in existence.

We believe that, consciously or unconsciously, Australia and the other Dominions realize this fact and the ability that it gives to him. Since they have seen the Prince it is his machine that is worked by a couple of men moving a lever back and forth. A cable was fastened to the tree trunk, and it should have come up by the roots, all theory being correct. Instead, it broke the first cable of steel—one inch thick and then, when two were wound around that old trunk, the tree shook and broke. The contractor gave it up as a bad job, and put several men on with axes to cut the roots.

## SUMMER COMPLAINTS KILL LITTLE ONES

At the first sign of illness during the hot weather, give the little ones Baby's Own Tablets or in a few hours he may be beyond aid. These Tablets will prevent summer complaints if they are given occasionally to the child and will promptly relieve them if the stomach is not unduly full. Baby's Own Tablets should always be kept in every home where there are young children. There is no other medicine as good and the doctor himself has recommended it. Government analysts that they are absolutely safe. The Tablets are sold by all medicine dealers or by mail at 25 cents a box from Dr. Williams' Medicine Co., New York, U.S.A.

## Make Life on The Farm Appealing

To Meet the Difficulty in Connection With the Exodus of Boys and Girls

Since the war a problem which has been worrying agriculturists all over the country, is that leaving the boy and girl on the farm. All the literature that I have seen on the subject shows quite plainly that no farmer has been discovered in connection with the exodus of the boys and girls from the farms. I think that the gentlemen who are in a position to make at least a long way towards solving the problem by adopting better farm methods; by making the home more attractive; by keeping better livestock; by making more profit on the farm, which will possibly more comfortable conditions such as will be conducive to happiness and contentment; by making conditions tolerable for the farmer's wife and generally by doing everything we can to make life on the farm appealing. In addition to this I think that good roads and cheap automobiles should play a very great part in helping to keep the young people on the farms by rendering them very valuable assistance to the farmer in different ways in connection with his work and by enabling him and his family to move around and mix with the neighbors, thus obtaining some social pleasure out of life.—Hon. S. F. Tolinie, in House of Commons, May 14, 1920.

## Minard's Liniment Relieves Distemper

Strength of Trees

Two Steel Cables Could Not Move Old Elm

Few people have any idea of the strength of trees. In Boston, Mass., a tree less than 100 years old, four feet in diameter, had to be removed from the common. Several of its limbs had been struck off by lightning, and it was supposed to be in a dangerous condition. So one of the tree-felling devices used in France for tearing down buildings, trees, etc., was brought into play. This is a machine that is worked by a couple of men moving a lever back and forth. A cable was fastened to the tree trunk, and it should have come up by the roots, all theory being correct. Instead, it broke the first cable of steel—one inch thick and then, when two were wound around that old trunk, the tree shook and broke. The contractor gave it up as a bad job, and put several men on with axes to cut the roots.

## NOTHING LIKE IT FOR BRONCHITIS AND WEAK THROAT

Remarkable Cures in the Worst Cases Reported Daily

Cures Without Using Drugs

Doctors now advocate an entirely new method for treating bronchitis and irritable throat. Stomach dosing is no longer necessary. The most approved treatment consists of a healing vapor ascending from the feet. This vapor is a full of germ-killing substances, and the same time is a powerful heating agent. It is sent to the bronchial tubes and lungs through a skillfully devised inhaler that can be carried in the pocket. Simply fasten the key to this splendid treatment.

CATARHOGONE is the name of this wonderful invention that is daily curing chronic cases of weak throat, bronchitis and Catarrh. Every breath through the inhaler is full of healing, soothing substances that destroy all diseased conditions in the breathing organs. It can't fail to cure because it goes where the trouble really exists and doesn't attempt to cure an illness in the head or throat by the use of medicine taken into the stomach. Catarrh is a direct, breathable steam cure.

There is no suffering from a grippy cold or any winter ill, that won't find its cure in Catarrh. This example of foreign science has been used for two months and costs \$1.00 and is guaranteed to cure. It is sold in two sizes, all storekeepers and drug stores, or the Catarrh Co., Kingston, Canada.

## The Peace River Country

Everything is Set For The Work of Expansion

The C. P. R. will operate the Dinosaur railway for the next five years. This is the essential link in connection with the arrangements recently entered into between the Canadian Company and the provincial government on the one hand, and the C.P.R. on the other. Four hundred and fifty miles of railway line is directly involved. This is a length of line practically equal to that from Montreal, Que., to London, Ont., from Winnipeg to St. Paul, Minn., from St. Paul to Chicago, and 60 miles farther than from Edmonton to Coats on the United States boundary. It is sufficient to give the 40 miles from Calgary and Lethbridge a third of a mile of development in such a stretch of country, which must in large measure follow the railway route.

The coming five years mean for the Peace River country. Conditions have become established. Population is settled. Everything is set for the work of expansion. The body of the river is there is no doubt as to the progress of the district and its people.

While the actual outflow of the river is sufficient to give the 40 miles a position of first-class importance. At Peace River town the river is only 100 feet wide and navigable waterway on the Peace. Along the whole of this distance the river flows through a region of climate and soil suitable for farming settlement. Already people are pushing in, and acquiring desirable holdings depending on the river for present communication and expecting that settlement and development will ultimately bring railway facilities.

The 40 miles of river is a great system of waterways extending to the Arctic north through a region carrying the same water to the coast. It is one kind or another—a development that depends on railway communication. It is a development that is accompanying it.—Edmonton Bulletin.

Montreal, May 20th, '20. Minard's Liniment Co., Limited, 40, Varnum St., N.Y.C.

Goodness!—I don't know what I have found. MINARD'S LINIMENT for some time and I find it the best I have ever used for the joints and muscles.

THOMAS J. HOGAN, The Champion Club and Federal Champion of Canada.

Cool and Heartless

"We don't have finished me with you extravagance. I am poor. There is only one place for the poor. Good-bye. I'm going."

"To the river!"

"Well, you'll be passing the post office. Do you mind posting this letter?"

Real Grief

Reverend Rector—"When I pictured the death of a man in a sort of accident, surrounded by empty bottles, my audience was moved to tears."

Pilgrims' Miss—"I can quite believe it. It is touching to think of the emptiness of those bottles."—London Mail.

The sewing needle is one of the oldest implements used by man. Bone specimens have been found in the reindeer caves of France.

## SUNDAY SCHOOL LESSON

LESSON FOR AUGUST 8

## THE KINGLY KINDNESS OF DAVID

I. David's Righteous and Impartial Reign (8:15)

When he was established as king over all Israel, he executed judgment and justice unto all his people. In this respect he stands as a type of the Lord Jesus Christ; for when David's greater son, the Lord Jesus, shall reign over all Israel, righteousness and justice will prevail in all the earth.

II. David's Inquiry for Some of Saul's House to Whom He Might Show Kindness (9:1-3)

This story of faithful love to a dead friend is quite refreshing. David, an experienced great grief when he received the news that Jonathan had fallen in battle. Now when he is making king and success has crowned his efforts in the subjugation of his enemies, he acts himself to make enquiry as to whether there is any one left of Saul's family to whom he might show kindness for Jonathan's sake. When Mephibosheth, Jonathan's son, was found, David ordered him to be brought to him and restored to him his grandfather's estate. Being unable to cultivate it on account of his lameness, he arranged that it be cultivated for him. Not content with this, he ordered that Mephibosheth should eat at his own table as one of his sons. This example of David's nobility teaches us that those who are blessed and prospered should stop to enquire whether there are not some deserving ones whom they can help. It may be that children of some old friends who rendered us in former days service, or who help. Then, too, some faithful servant of God could be cheered along life's way. This should not be simply done as an act of charity, but as recognition of some lasting obligation in view of help rendered by their fathers in former days. This was the case with Mephibosheth. He had suffered much and endangered his life for David's sake.

The chief value of this lesson will be realized by making it a living story illustrating the plan of salvation. David's making enquiry for some one upon whom he can bestow kindness illustrates God taking the initiative in providing salvation for lost and needy souls. This clearly shows that it is in David's expression, "show the kindness of God." Mephibosheth did not seek David's help or sympathy. Quite likely he was too fearful of David for him like the sinner has in many cases for the Lord. Salvation originated with the Lord. He did not make this provision because of man's merit, but out of a heart of grace, and the love of another, even Christ.

III. Mephibosheth is Found (10:1-5)

This lesson was found in the house of Machir in Lodebar. This strikingly illustrates the sinner's condition. The sinner is usually unable to walk uprightly before the Lord. Mephibosheth was in the house of Machir, which means "sinner." Exactly the sinner's condition—sold into sin and Satan. Lodebar means "no pasture." This, too, suggests the sinner's condition of soul which nothing will begin, and the sinner finds his grace can satisfy but God. The sinner must be saved by sin has an unclean heart, and only God and his grace can satisfy him.

IV. Mephibosheth's Sense of Unworthiness (10:6-8)

Then he was brought into the presence of the king. He is brought into his place. Every sinner in the presence of God feels unworthy. The sinner is usually unable to walk uprightly before the Lord. Mephibosheth was in the house of Machir, which means "sinner." Exactly the sinner's condition—sold into sin and Satan. Lodebar means "no pasture." This, too, suggests the sinner's condition of soul which nothing will begin, and the sinner finds his grace can satisfy but God. The sinner must be saved by sin has an unclean heart, and only God and his grace can satisfy him.

He who has restored his estate, provided a means of tillage. God not only restores us into his family as children and restores to us the estate forfeited by Adam, but provides for his culture and development.

VI. Mephibosheth at the King's Table (10:11-13)

This act of kindness on the part of David was done out of the sincerity of his heart. This illustrates God's kindness to us in Christ.

A Severe Lesson

A bond-victim gentleman on one of the stands was boasting to a party of admiring youngsters about the donkey derby he had done on the cricket field in days gone by.

"Sudden!" was the exclamation on the band. "Ah!" he observed, "I don't follow play decently, but they have fallen off a bit since I was a member of the band!"

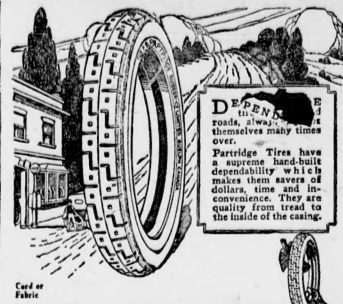

"What?" ejaculated one of the hearts with a curious expression. "You played with that lot?"

"Certainly," was the reply, "I was with 'em for years."

The crowd laughed, and the band leader, who was standing on the band, said in question was composed of imitators of the local noisemaker.

Pigeons carried 709 messages for the R.A.F. between April, 1918, and the armistice, often saving human lives and valuable airplanes.

Sooner or later a brave man bumps into a brand of terror that makes him look like a dollar million makes cents.

JOTTINGS  
OF  
TOWN AND  
DISTRICT

## Local News.

Mrs Joe Wyman and family are up from Calgary for a week or two.

Mr and Mrs Richard Thomson are away on a vacation.

Miss Gertrude Aylein, of Edmonton, was home for the week-end.

D. W. Osborne, of Texas, has been paying our district a business visit.

Miss Jennie Roberts has taken a position (temporarily) in the post office.

W. H. Spencer has resumed his old position as caretaker at the school.

J. H. Galbraith, of Monitor, is spending part of his vacation in this district.

Mrs A. F. Turner and family, of Fort Francis, Ont., has been spending a few days in town, guests of Mrs Geo. Gordon.

H. Strouse, who has been enjoying a two week's vacation in our midst with his family, returned to his duties at Fort Saskatchewan on Monday.

Mrs Hudson G. Jones is enjoying a visit from her parents, Mr and Mrs S. D. Hollister, of Portland, Oregon.

Mr and Mrs W. Rees Jones and family returned from their visit to the coast on Friday. Mrs Jones is feeling somewhat better.

Say, just glance over the Ponoka Engineering Works' advertisement as you farmers may find something to your advantage in it.

A. A. Cook, of the Bank of Commerce staff, is spending his vacation at Banff and other points in the mountains.

Our neighboring towns are receiving a number of war trophies, but so far nothing has come to Ponoka. Has any representation been made in the matter?

Mr and Mrs Robt. Watson, of Dixon, Cal., are visiting their daughter, Mrs Hans Rohwer. Mrs Rohwer is also enjoying a visit from her sister, Mrs Potter, of Los Angeles.

Geo. Oberman, of Iowa, was in our midst last week on a business visit. It is some eight years since he left here, and is surprised to see the prosperity and development that has taken place in that time. Mr Oberman has a section of land in this neighborhood.

Rev. R. W. W. Alexander, who has been pioneering in a district of 2000 square miles at Rocky Mountain House, has been appointed to the charge of Christ Church, Millerville and Priddis, by the Bishop of Calgary.

W. M. Kuhnke and daughter of Salem, Oregon, are visiting with relatives in this district. Mr Kuhnke has sold his fruit farm, and is taking a trip to the old home and is meeting many old friends.

Used 10-20 Titan for sale, or will take good team of horses as part payment. **BRADY & MORGAN.**

Miss E. T. Johnson was a visitor in Calgary the week-end.

Mrs T. E. Adelman and family, of East Moline, Illinois, are visiting with Mr and Mrs Ed. Schmidt.

Miss Helen Schulz has accepted a position in the Bank of Montreal, Red Deer.

T. W. Russell commenced cutting his wheat this week. This is about the earliest, but harvesting will be general by next week.

No rain, and haying is claiming attention, and being put up in fine condition. Rain would certainly be welcome however, and the grain crops would be benefited.

Three dray loads of Eaton catalogues were unloaded at the post office last week. This will make wholesome reading to many of our fervent citizens for many Sunday afternoons to come.

A number of the young boys are camping at Bush's Lake. Rev. O. Bishop is in charge.

Miss Tester, of Calgary, spent the week-end in town, visiting with her friend, Miss Grace Crawford.

CAPTAIN.—On Tuesday, August 10th, to Mr and Mrs Gordon Capping a daughter.

Side curtains and license plates for automobiles await owners at Herald Office.

A happy family reunion took place at the home of Mr and Mrs Jas. A. Dick, Brooks, on Sunday. The gathering numbered eighteen, and a very happy day was spent.

Rev. Douglas MacDonald, B.A., B.D., who has charge of the Presbyterian church at Killam, and is at present home on his vacation, preached in the Union church on Sunday last. The two able sermons which he preached were greatly appreciated by the congregation.

Union Church, Sunday, August 10th.—11 a.m., Mr E. H. Costain, 7:30 p.m., the Pastor will preach. All are heartily invited to these services.

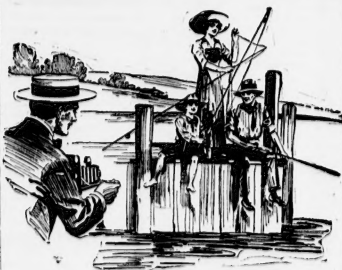

A dance will be held in the Brookes hall on Friday evening, the 13th. Lux's orchestra. All invited.

Baptist Church services, August 15th. Brooks, public worship at 11 a.m.; Sunday school at 12. Ponoka, 7:30 p.m. At the evening service Capt. R. McCauley will deliver the message. If it is a home-like church you are looking for come with us.

A pictorial sensation "Are You Legally Married?" will be shown in the Empress Theatre, Friday and Saturday, August 13 and 14. A revelation of the law every man, woman and child should see.

Call at the millinery store and secure a hat at half price. Lots to choose from.

Do not neglect your eyes. See Mr. Mecklenburg, the old reliable, long experienced and well established eye sight specialist about them. At Royal Hotel, Ponoka, on Friday, Sept 3rd.

Friday morning.

**Buckhorn**

Aug. 5.  
Henry Bush paid Buckhorn district a visit last Monday in search of a long lost horse.

Rev. E. Barnes and sister motored to Mr and Mrs E. H. Rowe's farm at an early hour Tuesday morning.

Things look very encouraging with our Crystal Spring Sunday school. It does one good to forget the weekly business for a while on the Sabbath. Come one and all, and bring your friends. We have classes for all.

A little bird is whispering around there is to be another picnic to Gull Lake shortly. It's great these hot days to take that glorious dip.

Mr and Mrs Saul Preston and sons, Paul and Bryan, motored with their friends, Mr and Mrs Peak, as far as Calgary last week-end, paying A. Preston, their son, a visit. From that city the Peaks are taking a beautiful trip through the mountains to California. We wish them all kinds of good luck.

It's good these days to get out in Buckhorn's wild woods and gather the bountiful fruits and listen to the farmers urging the patient horses in reaping the hay-meadows.

**NOTICE**

To HENRY A. CLARK, formerly of the Post Office of Home Glen, in the Province of Alberta.

TAKE NOTICE that action has been commenced against you in the Supreme Court of Alberta, Judicial District of Red Deer, by the Mercantile Bank of Canada, to recover the sum of \$802.56 and interest in respect of a Mortgage given by you, as a Mortgagor in favor of the said Mercantile Bank of Canada, on the 12th day of May, 1920, in the North-East quarter of Section No. 14 (40) Township 4, Range 4, E. 1, One (1), West of the 10th (5th) Meridian, in the Province of Alberta, and in the alternative, foreclosure of all your interest therein.

AND FURTHER TAKE NOTICE that you may deliver—  
(a) A Statement of Defence  
(b) A Demand that Notice of any application of the said action be given to you on or before the 15th day of September A.D. 1920, and in default of your so doing the Plaintiff may obtain judgment and the notice of five years with-out further notice to you.

Dated at the Town of Ponoka, in the Province of Alberta, this 21th day of July, A.D. 1920.  
Approved by  
J. Muldady,  
C.L.S.

**Thorough Lubrication**

IMPERIAL Lubricants can be depended on to give you thorough lubrication, to keep the engine running quietly and faultlessly, to take you a 100 miles or 1,000 miles at the least cost for fuel, oil and repairs.

Imperial Lubricants form a piston-to-cylinder seal that maintains compression and utilizes the full power of the fuel. It spreads a thin, yet unbreakable oil film over every friction surface that minimizes wear—it is the perfect lubricant.

Imperial Lubricants will not break up under high operating heats. It burns freely with hardly a trace of carbon. Costs less because it saves depreciation and fuel. Sold in gallon and four-gallon sealed cans, half-barrels and barrels, also 12½-gallon steel kegs, by dealers everywhere.

Look for the Imperial Lubricants Chart of Recommendations when you buy oil. It shows which of the three grades described below is recommended for your car. Use the grades specified, exclusively.

IMPERIAL POLARINE (Light medium body) IMPERIAL POLARINE HEAVY (Medium heavy body) IMPERIAL POLARINE A (Extra heavy body)  
A GRADE SPECIALLY SUITED TO YOUR MOTOR

**IMPERIAL OIL LIMITED**  
Power - Heat - Light - Lubrication
